

## Technology

“We had a challenge to use art straws to build the Eiffel Tower. Once we finished our straws we were only allowed a few more which was hard because we had to make arches at the bottom” – Hannah

“When we finished them most of them started to break because we only had 20 straws. We had to get on well with people that we don’t normally work with” – Callum S

“If someone walked into the classroom they had to know that it was a model of the Eiffel Tower and not just any tower. It had to be sturdy and it had to be able to stand on its own” – Callum C and Katie

“It was hard to build it because you had to make sure that everyone had a turn of doing something so that you didn’t leave anyone out” – Nieve

**We hope you like our models!**
