

P2b Newsletter Term 1

It has been a busy term so far in P2b with lots of exciting activities to help the children in their learning.

In maths the children have explored 2D shape and symmetry and are currently investigating 3D shape. Everyone is also working hard on the numbers to 100 and making sure their number bonds to 10 are practised to help their speed of recall.

Bug Club continues, as do the phonics which accompany it, and the children have written some lovely topic-based letters and poems. We are now looking at the order of the alphabet, upper and lower case letters and letter names.

In science we have been looking at our 5 senses and how they can help us to make sense of the world around us. We have played Kim's game, sound bingo, tried feely boxes and guess the smell experiments and look forward to tasting some new foods.

Our social studies topic- 'People who help us in our Community' is going well. A trip to the local Fire Station was enjoyed by all and really enhanced our knowledge about the many jobs and responsibilities that fire fighters have in order to keep us safe. The children were inspired to design, plan and make junk model fire engines in small groups with amazingly wonderful results. We look forward to having a visit from other people in our community to allow the children to ask questions about their job and how they can help us.
